

Keystone Direct POS

C1-F3-01 Summary of Benefits

Laborer District Council Heavy & Highway (GOLD)

Keystone Direct POS lets you maintain freedom of choice by allowing you to select your own doctors and hospitals. Under this plan, you must select a Primary Care Physician, but can access most care in-network or out-of-network without a referral. Referrals are required for routine radiology/diagnostic, podiatry, spinal manipulation and physical/occupational therapy. You maximize your benefits when you access care from a Keystone participating provider. If you access care from a provider who does not participate in our network higher out-of-pocket costs apply.

To get the most out of your benefits program, below are some key terms that you will need to understand.

- **Referral** - Documentation from your PCP authorizing care at a participating specialist for covered services.
- **Preapproval/Precertification** - Approval from Independence Blue Cross (IBC) for non emergency or elective hospital admissions and procedures prior to the admission or procedure. For in-network (referred) services, your participating provider will contact IBC for authorization. For out-of-network (self-referred) services, you are responsible for obtaining approval for certain services. For more information on the services requiring precertification, please refer to the back page of this summary.
- **Designated site** - PCPs are required to choose one radiology, physical therapy, occupational therapy, laboratory, and podiatry provider where they will send all their Keystone members. You can view the sites selected by your PCP at www.ibx.com.

Your Member Handbook will provide additional details about your benefits program. It will include information about exclusions and benefits limitations. It is important to note that this program may not cover all your health care services. Services may not be covered because they are not included under your benefits contract, not medically necessary, or limited by a benefit maximum (e.g., visit limit). After reviewing this information, please contact our Customer Service department if you have additional questions.

SERVICES BY A NON-PARTICIPATING PHYSICIAN/PROVIDER FOR NON-EMERGENCY SERVICES (IN-NETWORK CARE)

Preapproval/precertification is not a determination of eligibility or a guarantee of payment. Coverage and payment are contingent upon, among other things, the patient being eligible, i.e., actively enrolled in the health benefits plan when the preapproval/precertification is issued and when approved services occur. Coverage and payment are also subject to limitations, exclusions, and other specific terms of the health benefits plan that apply to the coverage request. Preapproval/precertification list subject to change annually.

In addition to the preapproval/precertification requirements listed above, you should contact KHPE and provide prenotification for certain categories of treatment so you will know prior to receiving treatment whether it is a covered service. This applies to network providers and members who elect to receive treatment provided by out-of-network providers (for members using Out-of-Network care). The categories of treatment (in any setting) include:

- Any surgical procedure that may be considered potentially cosmetic; and
- Any procedure, treatment, drug, or device that represents 'new or emerging technology;' and
- Services that might be considered experimental/investigative.

Your provider should be able to assist you in determining whether a proposed treatment falls into one of these three categories. You are encouraged to have your provider place the call for you.

PENALTIES:

POS In-Network Care: It is the network provider's responsibility to obtain preapproval for services listed. Members are held harmless from financial penalties if the network provider does not obtain preapproval.

POS Out-of-Network Care: It is the member's responsibility to initiate precertification for the services listed. The member will be subject to a 20% reduction in benefits if precertification is not obtained for the inpatient/outpatient treatment services listed above.
